

What is a spot welder?

This spot welder is a portable battery energy storage type, mainly used for welding 18650 cylindrical batteries, mobile phone battery, battery for handheld electric drills and other electronic devices. Built-in capacity: The spot welder has a built-in high-multiple 7,500mAh polymer power battery, and the maximum output current can reach 650A.

What if the spot welding machine cannot be charged?

When the spot welding machine shows that it cannot be charged, please be patient for more than 30 minutes to reactivate the charging function of the spot welding machine. Regarding the use of equipment, ensure sufficient power when using, and there will be better spot welding effect.

What is the battery capacity of a welding machine?

The battery has a capacity of 7,500 mAh and lasts longer. It also comes with a charging control module, charging the battery through type-C interface, with a maximum input of 5V/2A. And is charged with hundreds of welding points on commonly used nickel-plated sheets with the thickness less than 0.2mm/0.008inch.

How do I charge the spot welding machine?

A Type-c charging cable is used to charge the spot welding machine, and a file is used to sharpen the spot welding pen. If you have any questions about the product upon receipt, please contact us. If you have any questions during the spot welding process, you can also ask us, and we will provide you with a satisfactory response within 24 hours.

Why should you choose a portable spot welder?

Multiple protection: Our portable spot welders own perfect over-charge, over-discharge, over-temperature etc protection functions and double protection performance. Unique overheating protection device automatically cuts off power when the overheating occurs.

Can a spot welding machine replace a battery?

To replace the battery, we can use our spot welding machine to replace the nickel plate on the phone. It can be welding between materials, such as nickel plating and nickel plating, nickel plating and iron, nickel plating and stainless steel, iron and iron, stainless steel and stainless steel, etc. The electric welder charges faster.

Demand for energy storage systems (ESS) is growing hand-in-hand with increased demand for renewable energy. According to Bloomberg, demand for energy storage capacity set a record in 2023 and will continue to ...

This spot welder is a portable battery energy storage type, mainly used for welding 18650 cylindrical

batteries, mobile phone battery, battery for handheld electric drills and other electronic devices. Built-in capacity: The ...

AT mode--automatic welding (no foot pedal control, suitable for welding a large number of batteries for a long time). Energy Grade: 0-99T Welding Mode: Separated-style ...

Product Description. Product Features. The newly designed U.S. Solid USS-BSW00008 high-frequency inversion battery spot welder equips with the six super capacitors for energy storage ...

China leading provider of Spot Welding Machines and Energy Storage Welder, Shanghai Trintfar Intelligent Equipment Co., Ltd. is Energy Storage Welder factory. English English French ...

At first glance capacitor storage systems seem to offer best performance. However, an in-depth analysis reveals that a flywheel storage system gives better results for the given application, ...

801A Capacitor Energy-Storage Precision Pulse Spot Welder Super Energy-Gathered Pulse Technology. Features: 1. Compared to the traditional AC spot welding machine, the new-designed 801A capacitor energy ...

The new-designed capacitor energy storage welder uses the latest energy-gathered pulse technology, is has great welding power, the soldered dot is uniform and beautiful, no blackening. 3. The maximum output ...

Quickly replenishes power, and works continuously without interruption, greatly improving the stability of continuous spot welding. (3) All-metal aluminum shell body, fast heat dissipation, ...

VEVOR Battery Spot Welder, 14.5KW Capacitor Energy Storage Pulse Battery Spot Welder with 73B Welding Pen, 801D High Power Spot Welding Equipment & 2 Welding Modes for 0.1-0.3mm Pure Nickel, ...

Product Description. Product Features. The newly designed U.S. Solid USS-BSW00006 high-frequency inversion battery spot welder equips with the two super capacitors for energy ...

SeeSii 801D Spot Welder, 12KW Capacitor Energy Storage Pulse Battery Spot Welder with 73B Welding Pen, Support 2 Welding Modes Enhanced 0.1-0.3mm Nickel Strip for DIY & Industrial ...

U.S. Solid USS-BSW06 Battery Spot Welder 14.5 KW 2500A Capacitor Energy Storage Pulse Welding Machine, Mini Portable Spot Welding Equipment for 18650, 21700 Lithium Battery ...

Ultrasonic welding can join nonferrous metals like copper & aluminum to each other as well as to mild steels. New systems employ a novel approach called "direct press," which uses ultrasonic vibration. More-complex ...

Product Description. Product Features. The newly designed U.S. Solid USS-BSW00007 high-frequency inversion battery spot welder equips with the two super capacitors for energy ...

1. Compared to the traditional AC spot welding machine, the new-designed HT-SW01D capacitor energy-storage spot welder has no interfere to the electric circuit, no more tripping problems. ...
