OverviewCategoriesThermal BatteryElectric thermal storageSolar energy storagePumped-heat electricity storageSee alsoExternal linksThe different kinds of thermal energy storage can be divided into three separate categories: sensible heat, latent heat, and thermo-chemical heat storage. Each of these has different advantages and disadvantages that determine their applications. Sensible heat storage (SHS) is the most straightforward method. It simply means the temperature of some medium is either increased or decreased. This type of storage is the most commercial...

Work can proceed in parallel on the two reservoirs, the water conveyance, the powerhouse and the transmission. Construction timetables of 2-3 years are feasible for 10 GWh storages, although longer periods would be ...
