Luxembourg is a forerunner in Europe when it comes to the use of renewable energy. 65% of the electricity supplied to homes and businesses comes from renewable energies, compared with 35% for Europe as a whole. 27% comes from fossil fuels, compared with 40% in Europe. Only 7% of electricity supplied comes from nuclear sources, compared with 35% ...

Pourquoi choisir Sun Energie ? Expertise Locale : Forts de notre expérience au Luxembourg, nous comprenons les spécificités climatiques et géologiques du pays. Qualité et Fiabilité : Nous utilisons des matériaux de haute qualité et des technologies de pointe pour garantir la longévité et la performance de votre installation.

Energy renovation: the "Mamerhaff" is a remarkable and awarded example. The "Mamerhaff", a family project, is about the transformation of the grandparents' farm into two dwellings and a centre for alternative medicine and family meetings. The architectural reinterpretation of the building goes hand in hand with its functional and energy optimisation.

Biography. I am currently a Senior Lead R& T Scientist at the Luxembourg Institute of Science and Technology (LIST). I earned my Master's degree in Chemical Engineering from the University of Ljubljana, Slovenia, and pursued my PhD studies at the Jožef Stefan International Postgraduate School, specializing in Nanomaterials and Nanotechnologies, which I completed in 2012.

The SPETRA students will be supervised by researchers at the Luxembourg Institute for Science and Technology (LIST) and the University of Luxembourg (uni.lu), and they will work on cutting-edge problems that cover different ways in which sun light can be used as an energy source.
