

How can Kosovo improve its energy sector?

The Group's commitment to helping Kosovo improve its energy sector is broad: projects are designed to improve energy efficiency, ease the policy and regulatory environment for renewable energy and energy efficiency, address the environmental legacy of the old power plants, upgrade power generation to meet demand, and improve water supply.

Is Kosovo a member of the EU Energy Community?

As a member of the EU Energy Community, the country has committed itself to implement the energy chapter of the EU acquis. Hence, by 2030 the Government of Kosovo is aiming to reduce energy consumption by 32.5 per cent compared to projections, in orientation to the EU energy efficiency target.

Can Kosovo leapfrog to a fully decarbonised energy system?

Kosovo has very large lignite resources, totalling 12.5 billion tonnes, which it claims are the second largest in Europe and fifth largest in the world. It has no oil or gas extraction and no gas import infrastructure, thus providing an opportunity to leapfrog to a fully decarbonised energy system.

How much energy is lost in Kosovo in 2021?

According to Kosovo's Energy Regulatory Office, in 2021 transmission losses were at an acceptable level of around 1.26 per cent, but Kosovo has a serious issue with distribution losses, which amounted to 24.6 per cent.

Why is water important in Kosovo?

From renewable energy to hydropower to waste management, water is an inherent component of Kosovo's energy strategy and fundamental to the World Bank Group's energy engagement in the country. More...

Does Kosovo have a power grid?

Recently, Kosovo's power grid (energy network) has finally emerged from the regulatory bloc with Serbia, Montenegro and northern Macedonia, which means that Kosovo will henceforth control its energy borders, operating as an independent regulatory zone within the Kosovo-Albania bloc. 3. Distribution Substation (KEDS)
