

Which EnerSys® Cyclon battery is best?

At high-rate and pulse discharges, EnerSys® CYCLON batteries offer the best performance value when compared with competitive product in applications at less than 100 minutes of discharge. Cycle life - Compared to competitive lead products (offering up to 200 full cycles), pure lead batteries provide 50% to 200% greater full cycle capability.

Are Cyclon batteries safe?

Constructed of high-purity materials,CYCLON® batteries are engineered to provide longer service life,high reliability and with fewer replacements. Safe enough for installations in offices or hospitals. From general purpose to extremely demanding applications,CYCLON batteries offer better performance and lower long-term cost of ownership.

Where are EnerSys batteries made?

The EnerSys® plant in Warrensburg, Missouri covers 32,000 square feet and is situated on 33 acres. A 50-PSI vent lets gases escape, then automatically reseals, so there's no risk of excessive gas accumulation within the battery, or "dry out" failure from repeated recharges.

Are EnerSys batteries UL certified?

UL Recognized Component. Meets UL 1989Caution: Batteries contain toxic materials (Pb and H2SO4) o Avoid short circuit o Do not charge in gas-tight container Sealed-lead rechargeable battery must be recycled or disposed of properly. Contact EnerSys® Customer Service for details.

Made from 99.99% pure lead, CYCLON battery plates are extremely thin, so they offer more surface area than conventional batteries and far more power. High purity acid is absorbed right into the Absorbed Glass Mat (AGM) plate separators, so the CYCLON battery provides leak-proof operation in any position.

OSI Batteries is proud to be an Authorized Distributor and Value Add Center (VAC) for EnerSys®;

Cyclon Batteries. A rugged, reliable alternative to conventional lead alloy batteries. By housing a sealed, pure-lead, thin-plate design within an extremely rugged steel casing, CYCLON batteries outperform lead alloy batteries in a number of ways: ...
