

Does Hungary have a commitment to renewables?

Attila Steiner, Hungary's State Secretary for Energy and Climate Policy, said: "Hungary has a strong commitment to renewables. As the next step, the government's priority is to upgrade the national grid to be capable of integrating the rapidly growing electric capacity generated by weather-dependent energy sources."

What percentage of energy consumption is renewable in Hungary?

The national authors of Hungary forecast is 14.7% renewables in gross energy consumption by 2020, exceeding their 13% binding target by 1.7 percentage points. Hungary is the EU country with the smallest forecast penetration of renewables of the electricity demand in 2020, namely only 11% (including biomass 6% and wind power 3%).

Will Hungarian energy storage projects get subsidy support?

The Hungarian Ministry of Energy has announced that around 50 grid-scale energy storage projects with a cumulative capacity of 440 MW have received subsidy support through a tender launched in February this year.

What does the IEA review mean for Hungary?

The IEA review calls on Hungary to reduce fossil fuel consumption and diversify its energy sources towards a broader portfolio of renewables by drawing on the considerable potential of its wind and geothermal energy resources as well as extending the lifetime of existing reactors, where safety permits.

What does the IEA report say about Hungarian Energy Policy?

The IEA report recommends that the Hungarian government adopt additional targets and policies to lower fossil fuel consumption, increase energy efficiency and promote investment in clean energy technologies, skills and jobs.

Why did the EIB support rooftop photovoltaic installations in Hungary?

The EIB provided backing for rooftop photovoltaic installations in Hungary to accelerate the energy transition, strengthen power supply security, and boost climate action. The contribution of EUR48 million, facilitated through two operations, significantly bolsters the country's commitment to investing in renewable energy.

Overview Wind power Solar power Hydro power Geothermal power See also Hungary is a member of the European Union and thus takes part in the EU strategy to increase its share of renewable energy. The EU has adopted the 2009 Renewable Energy Directive, which included a 20% renewable energy target by 2020 for the EU. By 2030 wind should produce in average 26-35% of the EU's electricity and save Europe EUR56 billion a year in avoided fuel costs. T...
