

Can a solar system work in Peru?

To implement a solar solution that would work on such a massive scale and in such varied climates, the Peruvian government has made a tender won by Tozzi Green, an Italian company specializing in products, services, and projects for the development of plants and the generation of energy from renewable sources.

Why is electricity important in Peru?

The introduction of electricity into homes and communities makes them safer and healthier, and it expands opportunities for education and productivity. A decade of World Bank support has helped rural communities in Peru to realize the profound benefit of energy access.

How much electricity is available in Peru?

Based on the government's investment, along with the coordinated and innovative support of the World Bank, GEF, and ESMAP, it is estimated that the electricity coverage in rural areas of Peru more than doubled, from 30 percent in 2007 to 78 percent by 2015. administered by The World Bank.
