

What is the Economic Update for Equatorial Guinea?

Download the Economic Update for Equatorial Guinea in English. The World Bank today issued the 2024 Equatorial Guinea Economic Update which analyzes the country's recent economic developments and outlook and highlights the importance of designing effective fiscal instruments for sustainable forestry and economic diversification.

Is Equatorial Guinea a sustainable country?

44 Climate Watch (2024). Equatorial Guinea has shown commitment to sustainable development, but strong reforms are needed to promote sustainable forestry management and build forestry value-chains, increasing forest revenue, creating more jobs, and fostering inclusive economic participation.

Could a sustainable commercial forestry sector help Equatorial Guinea?

"Developing a sustainable commercial forestry sector that focuses on domestic value-added processing would help Equatorial Guinea meet both its economic diversification and forest preservation commitments," said Aissatou Diallo, Resident Representative for Equatorial Guinea.

How did the economy of Equatorial Guinea perform in 2023?

Following two years of recovery, the economy of Equatorial Guinea contracted by 5.7% in 2023, driven by a decline in the hydrocarbon sector.

How can we finance sustainable forest management in Equatorial Guinea?

Efficiently adopting forest-related fiscal measures, combined with the right policy mix to attract international and private financing, can help finance the sustainable management of forests in Equatorial Guinea amid a shrinking fiscal space.

Does Equatorial Guinea have good education quality data?

Note that IFs does not have education quality data for Equatorial Guinea and the high quality estimation from the IFs preprocessor that is reflected in Chart 27 is influenced by the country's status as an upper middle-income country and relatively high GDP per capita. World Bank, Equatorial Guinea Education Sector Diagnostic, 22 June 2017, 3-4.

A big thank you to the whole team of Ecoefficient Solutions. It was an absolutely pleasure to work with Laura, her team and the electricians who did the whole installation in a day (even facing a few challenges and no time for coffees). It ...

We have received Singapore Green Building Product (SGBP) certifications for several solutions and we are the first and the only elevator and escalator company to have all certifications with the highest possible "Leader" ratings. The SGBP-certified solutions are recommended for Green Mark-certified buildings in the Asia-Pacific region.

In 2025, the question isn't just about how we can increase food production - it's how we can do so in a way that minimises our impact on the planet and maximises the efficiency of every acre. This is where innovation intersects with necessity - new solutions that won't just improve productivity, but also address the global crises of our time.

The Data Center Solutions Market in Equatorial Guinea is constrained by limited awareness of the available solutions and high implementation costs. Many businesses in the country still rely on outdated or inefficient data center infrastructures, which reduces their competitiveness.

The AGV features an eco-efficient electric power system that uses the latest in Lithium-ion battery technology, making it much easier and more cost effective to maintain and operate than a comparable machine powered by lead-acid batteries. The fully electric drivetrain also ensures zero emissions at source.
