

Does Eswatini have a solar power plant?

The company currently has one solar plant, Lavumisa 10MW Solar PV Plant. The power plant, which tracks the sun from morning to sunset, generates a capacity of 13.75MW and contributes a guaranteed capacity of 10MW to EEC's power grid. There are several ongoing projects that are geared to improve Eswatini's citizens access to electricity.

Why is Eswatini's PV market growing?

The biggest driver of growth in Eswatini's PV market comes from private PV projects. In hopes of reaching ambitious goals, Eswatini has made solar panels and batteries exempt from import duties to help with this.

Can solar power help Eswatini achieve its electrification goals?

Although Eswatini's electrification rates are relatively high, they are still a long way off 100% (the country's target for 2022). Solar power is the most viable solution for Eswatini to help meet its electrification goals and save costs down the line.

How much power does Eswatini have?

The power plant, which tracks the sun from morning to sunset, generates a capacity of 13.75MW and contributes a guaranteed capacity of 10MW to EEC's power grid. There are several ongoing projects that are geared to improve Eswatini's citizens access to electricity. The current access rate stands at 82%.

What is driving Eswatini's growth?

The biggest driver of growth in Eswatini's PV market is private PV projects. In 2022, Eswatini partnered with Frazium Energy to commission a new 100MW solar storage project with 75,000 PV panels, hoping to produce more than 100 million kWh of electricity a year and generate at least 200 jobs.

Does Eswatini have access to electricity?

There are several ongoing projects that are geared to improve Eswatini's citizens access to electricity. The current access rate stands at 82%. Eswatini is ranked number 3 in the Southern African region on this measure.
