

Can you rent a Nio et7 battery pack?

The growth comes as NIO officially began renting its 150 kWh battery pack for the new ET7 this month, enabling over 621 (1,000 km) CLTC range. NIO launched the ET7, powered by a massive 150 kWh semi-solid-state battery, in January 2021. After several delays, the battery pack is available to rent on a daily basis as of this month.

How much energy does a Nio et7 use?

The ET7's aerodynamically efficient design enabled energy consumption of around 13 kWh per 62 miles. Nio's record-breaking sedan is about to receive a 2024 refresh - including its new superstar battery. Details and pricing will drop on April 25, while pre-orders and deliveries start soon after.

How much battery power does the et7 have?

Despite starting at a chilly 28 Fahrenheit (-2 degrees Celsius), the ET7 showcased exceptional performance, reaching its destination with 3 percent battery power remaining. Setting a new standard in the EV range

How long does a Nio et7 battery last?

To put its new ultra-long-range battery to the test, NIO's CEO William Li drove the ET7 for over 14 hours, covering 1,044 km (~650 miles) with some charge left to spare. NIO continues expanding the brand with new models and tech. The EV maker recently handed over the keys to the EL6 driver in Europe as it extends into new markets.

How far can a Nio et7 go on a single charge?

In conclusion, the Nio ET7's real-world test with its semi-solid-state battery marks a significant milestone in the EV industry. Achieving a 649-mile range on a single charge addresses range anxiety, a major hurdle for EV adoption.

How long does it take a et7 to run out of battery?

The ET7 traveling between Kunming and Zhanjiang went the astonishing 665 miles before running out of juice. It took over 15 hours on the road, with an average speed of 52 mph. That's the equivalent of driving from New York City to Detroit and arriving with nearly 62 miles left in the battery.

The ET7's ability to cover 649 miles on a single charge demonstrates Nio's commitment to innovation and positions its 150kWh Ultra Long Range battery as a leader in energy density and safety.
