

What is Ethiopia's electricity access rate?

Ethiopia currently has an electricity access rate of 45%, 11% of its population already have access through decentralised solutions. Strong government commitment to reach full access before 2030 in the STEPS.

Why is energy demand increasing in Ethiopia?

This results in a 300% increase in related oil consumption. To meet the needs of its growing population, Ethiopia remains a large producer of cement causing energy demand to increase significantly in both scenarios. Ethiopia currently has an electricity access rate of 45%, 11% of its population already have access through decentralised solutions.

Can Ethiopia supply a larger economy than today?

Ethiopia could supply a much larger economy than today in the AC, using only twice the energy, were it to diversify its energy mix and implement efficiency standards. In the AC, this diversification comes about as a result of a substantial expansion of geothermal energy along with increased use of oil within industry and for cooking. IEA.

How much hydropower does Ethiopia need?

Licence: CC BY 4.0 Ethiopia is currently heavily reliant on hydropower; plans to increase capacity to 13.5 GW by 2040 would make Ethiopia the second-largest hydro producer in Africa.

Will Ethiopia rely on fossil fuels?

Ethiopia will remain heavily dependent on fossil fuel imports. In both scenarios, imports of oil and coal increase; a significant increase in gas consumption (and imports) would help the country to make the most of its industrial potential.

SCU provides an energy storage system and EV charger microgrid system for a factory in Ethiopia to help the factory's trams charge. The energy storage system reduces the impact of EV chargers on the power grid ...
