

What energy sources are available in Mozambique?

Mozambique has abundant energy sources available for exploitation. As of 2021, the country was ranked first in energy potential of all the countries in the Southern African Power Pool (SAPP), with an estimated energy capacity of 187,000 MW. Available energy sources include coal, hydroelectricity, natural gas, solar energy and wind power.

What is Brilho in Mozambique?

BRILHO is a seven-year programme, 2019 - 2026, that will catalyse Mozambique's off-grid energy market in order to provide clean and affordable energy solutions to the country's off-grid population.

How much power does Mozambique have?

As of 2019, Mozambique had 2,185 MW of installed hydroelectric generation capacity, accounting for 92 percent of total national installed capacity of 2,375 MW. The 2,075 megawatts Cahora Bassa Hydroelectric Power Station (CBHPS) across the Zambezi River, is the largest power station in Mozambique.

How many hydropower stations are there in Mozambique?

There are over 3,400 megawatts of hydropower stations in the pipeline in Mozambique, the majority planned across the Zambezi River, including the 1,500 megawatts Mphanda Nkuwa Hydroelectric Power Station and the proposed 1,245 megawatts extension to the CBHPS.

What is the largest power station in Mozambique?

The 2,075 megawatts Cahora Bassa Hydroelectric Power Station (CBHPS) across the Zambezi River, is the largest power station in Mozambique. The power station is operated by Hidroelectrica de Cahora Bassa (HCB), a Mozambican parastatal company.

Who owns Mocuba solar power station?

In August 2019, the first grid-ready solar power station, the 40 megawatts Mocuba Solar Power Station, in Mocuba District, Zambezia Province, achieved commercial commissioning. Developed as a public-private partnership (PPP) project, it is co-owned by a European IPP, a Mozambican parastatal and a European financier.
