

Why is Saudi Arabia developing new energy sources?

Despite the abundance of hydrocarbon resources, Saudi Arabia has most recently been developing new energy sources that complement and add to the Kingdom's existing energy mix, while aligning with the Kingdom's economic diversification vision, Vision 2030.

How is Saudi Arabia developing its solar energy sector?

1. Saudi Arabia has initiated the National Renewable Energy Program (NREP) to develop its solar energy sector, with several projects in progress, including a 600 MW capacity project. 2. Large-scale project such as Sakaka solar Independent Power Producer (IPP) (300 MW) and Dumat Al Jandal wind project (400 MW) were part of the first bidding process.

What factors govern energy transition pathways in Saudi Arabia?

Renewable energy, hydrogen, nuclear, scaling up carbon capture and storage technologies as well as enhancing energy efficiency have been top options pursued in the Kingdom's energy transition profile. This work focuses on the specific factors that govern energy transition pathways in Saudi Arabia.

Does Saudi Arabia need a holistic approach to energy transition?

By bridging this research gap, the study offers valuable insights into the complexities and unique challenges countries like Saudi Arabia face in their pursuit of energy transition. The paper also highlights the importance of adopting a holistic approach to decision-making in energy transitions.

How can Saudi Arabia support innovation in the energy sector?

Furthermore, supporting innovation in the energy sector emerges as a critical aspect. Saudi Arabia has the financial and human capacity to strengthen its national innovation system and stimulate cooperation between all stakeholders who can be potentially involved in energy innovation, including the academic, private, and government sectors.

How has Saudi Arabia progressed in technology?

Saudi Arabia has achieved notable progress in the fields of technology, electronic waste management, and renewable energy pledges, alongside augmenting the inclusivity of the Information and Communication Technology (ICT) sector and attaining ambitious ITU "Connect 2030" objectives. 1.

Saudi Aramco expanded globally, forming Star Enterprises in 1989, a joint venture with Texaco in the United States, which evolved into Motiva. By 2017, Saudi Aramco became the sole owner of North America's largest ...

As the needs of Saudi Arabia evolve and Vision 2030 adjusts to meet these changes, the VRPs flexibly adapt and align to ensure the successful accomplishment of Vision 2030. ... the program is committed to a green

future with significant investments in wind and solar energy. Saudi Arabia, with its \$1.3 trillion in minerals, is now a leading ...

For around four years now, Saudi Arabia has been looking for an elegant exit from the Yemeni civil war. This is, in large part, because fighting in Yemen has dragged on and proved far more costly than Riyadh initially anticipated. When, in 2015, it led a coalition to restore the internationally recognized government of President Abed Rabbo Mansour Hadi and roll ...

In this Q& A, we sit with Javier Alvarez Quero, Senior Managing Director and Head of FTI Delta Technology Practice, to explore Saudi Arabia's rapid transformation into a global tech powerhouse. With its Vision 2030 roadmap, the Kingdom aims not only to diversify its economy beyond oil. Still, it is also a hub for cutting-edge innovation across AI, digital ...
