

What is the government's long duration electricity storage consultation?

The Government's long duration electricity storage consultation, published on 9 January 2024 (the "Consultation"), aims to address the challenges and opportunities associated with investment into long duration electricity storage ("LDES").

What is the consultation on long-duration electricity storage?

The consultation follows a call for evidence in 2021 to understand the barriers to the deployment of long-duration electricity storage. A copy of the consultation will be deposited in the Library of the House. [HCWS171] Hansard record of the item : 'Long-Duration Electricity Storage: Consultation' on Tuesday 9 January 2024.

Where can I find a long-duration energy storage proposal?

This consultation is available from: If you need a version of this document in a more accessible format, please email [alt.formats@energysecurity.gov.uk](mailto:alt.formats@energysecurity.gov.uk). Please tell us what format you need.

Will long-duration electricity storage help us reach net zero?

Long-duration electricity storage technologies will be central to a secure, cost-effective and low carbon energy system. External analysis indicates that deploying long-duration electricity storage could save billions of pounds for consumers, making sure that we reach net zero in a proportionate and pragmatic way.

What is electricity storage?

Electricity storage encompasses many different technologies - of various sizes, locations and durations - across the entire electricity system. It has many critical functions, which include:

Should we invest in long-duration energy storage?

Pumped hydro storage is the most established long-duration energy storage technology. Investing in this technology requires significant capital with a long build time. Time has been one of the biggest challenges facing the energy sector. We need a policy to enable investment in long-duration electricity storage projects.

MITEI's three-year Future of Energy Storage study explored the role that energy storage can play in fighting climate change and in the global adoption of clean energy grids. Replacing fossil fuel-based power generation with power ...

Battery Energy Storage Systems (BESS) - Frequently Asked Questions (FAQ's) ... however in all cases the applicant must provide evidence of both compliance with municipal policies and ...

The AESO held a virtual Energy Storage Tariff Working Group Stakeholder Session on June 6, 2023 from 9 a.m. to 12 p.m. Purpose. The purpose of this session is to update industry on progress of the Energy ...

cumulative requirements for storage at specific locations so as to ensure that the optimum amount of storage is procured. This call for evidence paper seeks to explore if there is a needs case ...

Electricity Storage definition: The Consultation proposes that any technology supported through an LDES scheme should meet the definition of electricity storage as set out ...

Energy storage is a key part of the Government's Clean Growth and Industrial Strategies and will play an important role in ... electricity storage 7 . In the consultation document we proposed ...

Policy support for energy storage is essential to help bring forward the investment needed for long-duration energy storage. With the retirement or conversion of unabated gas plants post-2030, delivering the levels of energy storage and ...
