

Could the Falklands become an energy powerhouse?

The Falklands might seem an odd candidate to become an energy powerhouse. The likely presence of commercial quantities of oil has been known for decades, yet successful development has always seemed improbable. The Islands were too remote, the weather too inhospitable, the cost too high. Now, however, the odds are shortening.

How much electricity does the Falkland Islands use?

The Falkland Islands generates 19,000 MWh of electricity as of 2016 (covering 108% of its annual consumption needs). The Falkland Islands consumed 17,670 MWh of electricity in 2016. The Falkland Islands did not import any electricity in 2016. The Falkland Islands didn't export any electricity in 2016.
