

How to judge the progress of energy storage industry in China?

Chen Haisheng,Chairman of the China Energy Storage Alliance: When judging the progress of an industry,we must take a rational view that considers the overall situation,development, and long-term perspective. In regard to the overall situation, the development of energy storage in China is still proceeding at a fast pace.

How much energy storage capacity does the energy storage industry have?

New operational electrochemical energy storage capacity totaled 519.6 MW/855.0 MWh (note: final data to be released in the CNESA 2020 Energy Storage Industry White Paper). In 2019, overall growth in the development of electrical energy storage projects slowed, as the industry entered a period of rational adjustment.

Should energy storage be included in the cost of transmission and distribution?

Such are the basic conditions for energy storage to be included in the cost of transmission and distribution of electricity. Energy storage is of vital importance to the energy transition. The opening of the power market can help elevate energy storage to become a natural core part of the power market.
