

What types of batteries are used in residential solar systems?

Lithium-ion batteries are the most common type of battery used in residential solar systems, followed by lithium iron phosphate (LFP) and lead acid. Lithium-ion and LFP batteries last longer, require no maintenance, and boast a deeper depth of discharge (80-100%). As such, they've largely replaced lead-acid in the residential solar battery market.

Which battery is best for solar panels?

Again, whether an AC- or DC-coupled battery is best depends on whether or not you already have solar panels. Some popular batteries that fit this criteria include: Obviously, if you want to provide backup power, then a backup-enabled battery is required and consumption-only configurations are not an option.
