

Will Fiji be able to produce 100% of electricity by 2030?

10.3.1 To derive as close to 100%of electricity services from renewable energy sources as possible by 2030. In keeping with Fiji's climate change commitments and development goals,Fiji will systematically scale up the transition to renewable energy-based electricity production.

Why does Fiji rely on fossil fuels?

National energy production and consumption in Fiji remains highly dependent on imported fossil fuels in part due to the current demands of the transport sectorand the ongoing reliance on thermal power plants to supplement renewable energy sources within Fiji's electricity sector.

What is the future of Fiji's energy sector?

The future of Fiji's energy sector will continue to be shaped by these factors. Today, as much as 60% of Fiji's electricity generation is derived from hydropower while remote islands and some rural areas are largely dependent on energy production powered by imported fossil fuels.

How does Fiji generate electricity?

Today,as much as 60% of Fiji's electricity generation is derived from hydropowerwhile remote islands and some rural areas are largely dependent on energy production powered by imported fossil fuels. The growth of Fiji's land transport sector has been largely concentrated around growing urban centres.

What is Fiji's energy policy?

This Policy will ensure that Fiji's agricultural sector and local industries can benefit from a further source of sustainable, indigenously-sourced energy while minimising any potential impacts on the environment or national food security.

How can Fiji improve national energy statistics?

Working in collaboration with the Fiji Bureau of Statistics,efforts will be made to improve the detail and relevance of national energy statistics to help influence and inform prioritisation,decision-making,planning,and resource mobilisation.
