

Will there be a battery storage unit in Finland?

The construction for the battery storage unit is on-going. Customer Manager Antero Reilander from Fingrid says that Neoen inquired - via a consultant - in October 2019, if there would be a suitable plot for battery storage facility somewhere in Finland.

Does Finland have a national battery strategy?

As demand for batteries increases, the need to find solutions is urgent. Business Finland has granted the BATCircle 2.0 consortium with 10.8 million euros. Business Finland's recent release on Finland's national battery strategy, featuring the research of life-cycle assessment of battery recycling, attracted a lot of international coverage.

What makes Finland a good battery company?

Finland has expertise throughout the battery value chain, from the mining industry and processing of raw materials to technologies and services related to the manufacture and use of batteries, as well as charging technologies and recycling.

Why is Finland partnering with the European battery industry?

One of the key elements of a sustainable and competitive battery ecosystem is recycling, and Finland has been chosen to coordinate the European battery industry's research on the topic. The planned pCAM and CAM factories would generate thousands of jobs in the Kymenlaakso region, enough to drain local supply of workforce.

Is Yllikk&#228;l&#228; the biggest battery storage project in Europe?

"Yllikk&#228;l&#228; is a key project for our company, being the largest of its kind for us in Europe. It is a very good complement to our renewable project developments in Finland," says Prot. Antero Reilander comments that while there have been other battery storage projects in Finland, this one is the biggest - by far.

Is Yllikk&#228;l&#228; a suitable plot for a Neoen battery storage facility?

Customer Manager Antero Reilander from Fingrid says that Neoen inquired - via a consultant - in October 2019, if there would be a suitable plot for battery storage facility somewhere in Finland. "We made a survey of the entire country and quickly focused on Yllikk&#228;l&#228; which seemed like a really good fit for Neoen," Reilander looks back.

The 56.4 MW / 112.9 MWh lithium-ion 2-hour battery will be the largest in the Nordics. It will be located in Yllikk&#228;l&#228;, near Lappeenranta city centre and approximately 100 ...

An Uninterruptible Power Supply is a device/system that provides emergency power to connected devices when the primary power source fails. Your UPS serves as a crucial safeguard against power interruptions like

outages, ...

When French renewable energy expert Neoen wanted to build the Nordics" largest battery storage unit in Finland, Fingrid was ready and eager to lend a hand. Neoen was looking for a suitable plot and the Finnish TSO had ...

HPE Online Double Conversion Rackmount Uninterruptible Power System enables high system availability by eliminating transfer time to battery power for all connected IT equipment. HPE ...

When it comes to backup systems, there are two main players in the field: central battery systems and uninterruptible power supplies. While they may seem interchangeable, there are some ...

The 30 MW large-scale battery from Merus Power, a leading Finnish technology company, will have one of the highest capacities in Finland and will become operational in Valkeakoski in mid-2025. The battery energy ...

At 30 MW / 30 MWh, Yllikk&#228;l&#228; Power Reserve One will be the first independent, large-capacity battery to be connected to the Finnish grid; It will provide the national electricity ...
