

### Who is FlexGen?

We're hiring! FlexGen designs and integrates battery energy storage solutions and the software platform that is enabling today's energy transition. We deliver utility-scale battery storage projects integrated with traditional and renewable power generation and armed with HybridOS(TM), our best-in-class energy management software.

### Will EOS & FlexGen develop a Bess solution?

Eos and FlexGen plan to jointly develop and commercialize a comprehensive integrated U.S. BESS solution, combining Eos' patented Z3 batteries, a domestic inverter and transformer package, with FlexGen's HybridOS(TM) EMS.

### Why should you partner with FlexGen?

"By partnering with FlexGen, a recognized leader in energy system control and optimization, we will widen our reach and deliver unparalleled value to customers across both of the respective company's pipeline," said Justin Vagnozzi, Senior Vice President of Global Sales at Eos Energy.

### What is FlexGen and how does it work?

FlexGen started life over a decade ago specialising in microgrids for customers including the US Military, but has more recently become known for grid-connected energy storage systems. It has deployed numerous systems in Texas and started exploring niches in Midwestern US states.

### What is FlexGen BMS?

FlexGen's Domestic BMS Delivers Enhanced Security, Supply Chain Resilience, and Superior Performance Our US-based BMS offers fortified cybersecurity measures and complete control over the software stack, ensuring the highest levels of protection for critical energy infrastructure.

### Why should you choose FlexGen for your Bess project?

Support environmental and economic goals when energy resiliency, and operational efficiency is secure. Our strength is in our flexibility. With the combination of modular EMS software and services, FlexGen can meet you where you are in any phase of your BESS project.

Then just getting more intertwined and having multiple OEMs offering a factory-integrated FlexGen EMS ready to go from the factory. Our publisher Solar Media is hosting the 10th Solar and Storage Finance USA ...

FlexGen has proven reliability in the harshest operational conditions, like the Texas Freeze, with HYBRIDOS sites delivering over 99.7% uptime availability. HybridOS software is capable of responding faster than the most stringent industry standards require, including Fast Frequency Response Advancement (FFRA) in ERCOT.

By implementing an EMS, organizations obtain a competitive advantage in a changing energy environment marked by digitization, decarbonization, and decentralization. An EMS facilitates effective management of energy resources, the synchronization of consumption with sustainability objectives, and reduced expenses.

One such solution is the energy management system (EMS), a technology that is reshaping how we approach energy usage, storage, and conservation. Understanding Energy Management Systems. ... FlexGen, stands out as a leading provider of energy storage solutions and software technology. Their expertise in creating advanced energy systems ...

FlexGen's commissioning services streamline the deployment of battery energy storage systems by ensuring accuracy, functionality, safety, ... Today, we are providing large scale, some even 530MW+ energy storage solutions combined with our best-in-class EMS software, HybridOS, to help our clients realize the most value from their energy ...

2 ??&#0183; EDISON, N.J. and DURHAM, N.C., Dec. 19, 2024 - Eos Energy Enterprises, Inc. (NASDAQ: EOSE) ("Eos" or the "Company"), a leading provider of safe, scalable, efficient, and ...

FlexGen's Vision with HybridOS. FlexGen's launch of HybridOS 11 energy management software underscores their vision for a sustainable and efficient energy future. By leveraging HybridOS, FlexGen aims to empower storage owners and operators with unparalleled control over their energy assets, driving the energy transition forward.

FlexGen's HybridOS EMS: ERCOT's FFR requirements have completely changed the game for BESS in Texas. With the most stringent response times in the United States, battery storage operators in Texas really had to step up the BESS software on existing sites and new builds. The HybridOS energy management system is lightning fast, enabling ...

Within the realm of e-mobility, an Energy Management System (EMS) assumes a crucial function as it facilitates dynamic load management, optimizes the charging process for improved efficiency, and enables intelligent bidirectional charging.

FlexGen White Paper balance, and stabilize the energy grid. By charging batteries during periods of low ... (EMS), IPPs can use value stacking to create multiple revenue streams. Beyond selling the stored electricity itself, IPPs ...

Flexgen also claims to have expanded the EMS' microgrid capabilities to allow it to continue supplying charging power regardless of what is happening on the power grid, like an outage, for example. "EV's are the future, and flexible, advanced, available EV charging is the most important step to realising that future. With Hybrid OS ...

1 ??&#0183; Eos and FlexGen to jointly expand and develop robust pipeline opportunity of over 50 GWh. Companies targeting a fully integrated made in America energy storage solution that combines Eos" Z3 ...

FlexGen's Commitment to Excellence. FlexGen is dedicated to providing leading energy storage solutions. With HybridOS, FlexGen delivers a software solution that meets the diverse needs of energy storage owners and operators. Here" s why HybridOS stands out:

Heralding a New Era in Energy Management with FlexGen's EMS The energy management landscape is undergoing a significant transformation in an era where energy efficiency and sustainability are at the forefront of global priorities. Amidst this evolution, FlexGen emerges as a beacon of innovation with its Energy Management System (EMS), setting new benchmarks for ...

It utilises its HybridOS 9.3 EMS platform and a containerised energy storage system (ESS) to optimise energy consumption for the charging network operator, and the platform integrates with on-site energy resources. ...

The FlexGen BMS is engineered for control at block and site level. FlexGen CTO Hugh Scott added that the BMS is optimised to enable "greater system efficiency and performance". Its launch comes shortly after the company launched the newest version of its AI-enhanced software platform and energy management system (EMS), HybridOS.
