

The Florida Solar Energy Center (FSEC) is now accepting solar thermal collector and system certifications from the Solar Rating & Certification Corporation(TM) (SRCC), a member of the International Code Council (ICC) Family of Companies, and the International Association of Plumbing and Mechanical Officials Research and Testing. SRCC and IAPMO certifications ...

Whether you're powering a pocket calculator, satellite, or your home, solar electricity, also known as photovoltaics, can get the job done. The Solar Energy Department of the Florida Solar Energy Center (FSEC) has been researching photovoltaics (PV) for over 30 years and they know the ins and outs of the technology.

Mickie Valente President Valente Strategic Advisers, LLC. Mickie led the development of Emergency Support Function 18 for Business & Industry at Florida's State Emergency Operations Center and she serves on disaster response and recovery task forces and initiatives for the Business Civic Leadership Center of the U.S. Chamber of Commerce and the International ...

Florida Solar Energy Center 1 Florida Hydrogen Initiative (FHI) DOE Contract # DE-FC36-04GO14225 Dr. David Block, Director Emeritus. Florida Solar Energy Center. block@fsec.ucf . 321-638-1001 Phone. 321-504-3438 Fax. June 10, 2010. This presentation does not contain any proprietary, confidential, or otherwise restricted information. Project ...

Florida Solar Energy Center. The Florida Solar Energy Center (FSEC) is a research institute of the University of Central Florida, located on a 20-acre (.08 km²) research complex on Florida's Space Coast at UCF's Cocoa satellite campus. FSEC is the largest and most active state-supported renewable energy and energy efficiency research, training, testing and certification ...

The Florida Solar Energy Center is required by Section 377.705 of the Florida Statutes to develop standards and certify all solar energy equipment manufactured or sold in Florida. To meet the requirements of the Florida Statutes, FSEC has developed a PV ...

The story begins with the energy crisis of 1973 and ends with the Florida Solar Energy Center's 30 th anniversary. Reflecting back on the Center's 30-year history begins with a look at the '70s, when it all began. Started by the Florida Energy Committee and the Florida State Legislature in 1974, we were the first, and remains the premiere ...

Laboratory Testing of Reflectance Properties of Roofing Materials, FSEC-CR-670-93, Florida Solar Energy Center, Cape Canaveral, FL. Figure 23. Solar reflectivities of roofing materials. Past research has indicated substantial energy savings associated with white roofs. After re-surfacing the gray modified bitumen roof of one of the classroom ...

The story begins with the energy crisis of 1973 and ends with the Florida Solar Energy Center's 30 th anniversary. Reflecting back on the Center's 30-year history begins with a look at the "70s, when it all began. Started by the Florida ...

The Southeast is rapidly expanding its use of solar power, with Florida leading the region and planning further growth, according to a new report by the Southern Alliance for Clean Energy.. Florida utilities lead the Southeast in total solar capacity, which measures (in megawatts) the potential amount of electricity produced by solar power installations in a given ...

The SunSmart E-Shelter Program, coordinated by UCF's Florida Solar Energy Center, has installed more than 100, 10-kW photovoltaic systems on emergency shelter (Enhanced Hurricane Protection Area) schools throughout Florida. This ambitious program brought together school administrators, code officials, teachers and students, solar industry ...

The Florida Solar Energy Center is a large blue building with red and yellow trim. You will easily be able to see it on your right-hand side across this intersection (see photo at right). Proceed straight through the intersection, move into the right-hand lane, and turn right into the ...

The SunSmart E-Shelter Program, coordinated by UCF's Florida Solar Energy Center, has installed more than 115, 10-kW photovoltaic systems on emergency shelter schools throughout Florida. This ambitious program brought together school administrators, code officials, teachers and students, solar industry professionals, researchers, and emergency ...

In addition, the Laws of Florida (§#167;377.705, FS) require that all solar systems manufactured or sold in the state of Florida comply with Solar Equipment Standards promulgated by the Florida Solar Energy Center ® (FSEC ®). These standards cover both solar thermal equipment and solar electric equipment.
