#### Is liquid air energy storage a good investment?

Liquid Air Energy Storage (LAES) is a promising energy storage technology renowned for its advantages such as geographical flexibility and high energy density. Comprehensively assessing LAES investment value and timing remains challenging due to uncertainties in technology costs and market conditions.

### How much LCoS should you invest in energy storage?

The LCOS at the optimal investment time is 0.105-0.174\$/kWhe. Discharge subsidy needs to reach 0.133\$/kWh to trigger immediate investment. Liquid Air Energy Storage (LAES) is a promising energy storage technology renowned for its advantages such as geographical flexibility and high energy density.

### What is liquid air energy storage?

Liquid air energy storage (LAES) is composed of easily scalable components such as pumps, compressors, expanders, turbines, and heat exchangers. Through these components, it stores electrical energy as thermal energy rather than mechanical energy, which is later recovered during discharge.

### What is a multi-generation liquid air energy storage system?

Schematic diagram of the multi-generation liquid air energy storage system. In the multi-generation LAES system, the remaining high-temperature thermal oil serves as the heat source for the absorption refrigerator (AR), enabling the generation of cold energy.

What is the optimal investment value for storage?

The levelized cost of storage at the optimal investment time is 0.105-0.174\$/kWhe,and the optimal investment value is 882-9269k\$. It is also found that preferential taxation policies can increase the LAES investment value. Increasing investment subsidies and technology learning effects have limited impacts on stimulating investments.

#### What is a working fluid for ASU?

Wang et al proposed the use of crude nitrogen from the ASU as the working fluid for LAES, part of compression heat from LAES charging process for the regeneration of ASU absorber (air cleaning unit), and the use of high-purity oxygen product from the ASU sold for additional revenues.
