

## French Southern Territories backup solar system

Is AFRR the future of battery storage in France?

France also shares common frequency regulation markets with much of Europe and some of these, notably the newly-introduced automated Frequency Restoration Reserve (aFRR), are being seen as important revenue streams that could be stacked to further the business case for battery storage in the continent.

Is France a good place to invest in battery storage assets?

This is all the more encouraging because unlike the UK, there are only two revenue streams available for battery storage assets in France today. The other is frequency control reserve (FCR), aka primary control reserve (PCR), what could be seen as the first rung of the ancillary services ladder.

Are French solar installations bolstered by a new law?

Beyond falling prices, the IEA PVPS report said solar installations were bolstered by the measures introduced in the French government's Law for the Acceleration of Renewable Energies which came into force in 2023. A requirement that competitive tender winners share some of the added value with locals.

Do car parks need solar roofs in France?

A requirement that competitive tender winners share some of the added value with locals. Car ports and car parks have become a significant driver of solar adoption in France. In November 2022, the government passed a law requiring all large car parks to have solar roofs from mid-2023.
