

Are energy storage projects legal in France?

However, energy storage projects in France face several legal and commercial challenges. In particular, the current regulatory framework allows for energy storage, but there is no legal framework designed for its development.

How much money did France commit to oil and gas?

By energy type, France committed at least USD 17.58 billion to oil and gas (at least USD 7.59 billion to unconditional oil and gas and at least USD 9.99 billion to conditional oil and gas). In addition, no public money commitments identified for coal. Further, no public money commitments identified for hydrogen based on fossil fuels.

How does France respond to an oil emergency?

France's response to an oil emergency is primarily based on releasing oil stocks held by the industry. Active market entities, high quality and accuracy of data reporting, and both public and private institutions engaged in the response policy, allow for efficient coordination between the country's administration and market players.

What happened to France's refining capacity in 2019?

The country's refining capacity fell to 62 million tonnes (Mt) in 2019 from 98 Mt in 2009, a decrease of around 40%. Total is the biggest operator in the country with four refineries (Donges, Feyzin, Gonfreville and Grandpuits), Esso operates sites in Gravenchon and Fos; and Petroineos owns the refinery in Lavera.

What are the EU regulations relating to electricity?

2 Directive (EU) 2019/944 of the European Parliament and of the Council of 5 June 2019 on common rules for the internal market for electricity and amending Directive 2012/27/EU, &#167;62. 3 Law No. 2021-1104 of 22 August 2021 on combating climate change and strengthening resilience to its effects.
