

What are the main sources of energy in Gabon?

(October 2009) Energy in Gabon comes from two main sources, fossil-fuels and hydroelectricity. Gabon also relies heavily on oil for its export revenues, exporting both crude oil and petroleum. In terms of its oil reserves, the country is one of the richest in sub-Saharan Africa, ranking 5th after Nigeria, Angola, Sudan, South Sudan, and Uganda.

Why is Gabon redeveloping its energy sector?

The upstream segment of Gabon's energy sector is seeing renewed interest on the back of recent regulatory changes, and drilling campaigns from some of the world's most prolific E&P companies are centered on redeveloping mature fields, though possibly at the cost of exploration.

Why is Gabon a good country?

Gabon also relies heavily on oil for its export revenues, exporting both crude oil and petroleum. In terms of its oil reserves, the country is one of the richest in sub-Saharan Africa, ranking 5th after Nigeria, Angola, Sudan, South Sudan, and Uganda. Renewable energy in the form of solar power is virtually nonexistent.

Who controls the oil industry in Gabon?

The government of Gabon controls all petroleum and mineral rights within the state. In 2011 a presidential decree created the Gabon Oil Company (GOC). This new entity works in partnership with international companies operating in Gabon and operates two fields: Obangue and Remboue.

How much electricity does Gabon produce?

Gabon's total electricity production in 2015 was 199 kilotonne of oil equivalent (ktoe), with 51.7% produced from hydropower sources and 48.2% from fossil fuels. The country's final consumption of electricity was 169 ktoe.

Does Gabon have a future?

Since production started in the 1950s, the majority of the country's GDP has been derived from crude oil exports. However, after oil production peaked in 1996, Gabon's future looked less certain, particularly following the price crash of 2014 and the disruption caused by the Covid 19 pandemic.
