GEM A-CAES LLC's (Gem) application for construction of a \$950 million to \$1 billion energy storage facility in Kern County, California, complete, which allows the 12-month approval process to begin. The 500-Megawatt (MW), 4,000 Megawatt-hour (MWh) advanced compressed air energy storage (A-CAES) center will be capable of operating 24/7

The subsidiary, called Gem A-CAES LLC, is looking to build the so-called Gem Energy Storage Center outside of the City of Rosamond. It will utilise the company's proprietary Advanced Compressed Air Energy Storage (A-CAES) technology, providing long-duration energy storage for the region with no fossil fuel consumption and no greenhouse gas emissions.

Hydrostor, a global long-duration energy storage (LDES) developer and operator, has achieved multiple key milestones in its journey to construct and commission the Willow Rock Energy Storage Center project in Kern County, California.. Included in these milestones is Hydrostor filing a Supplemental Application for Certification and the execution of the project's ...

In accordance with the provisions of Title 20, California Code of Regulations, GEM A-CAES LLC hereby submits this Application for Certification, seeking authority to construct and operate the Gem Energy Storage Center, a 5 00 MW, advanced compressed air energy storage (A-CAES) facility, utilizing Hydrostor Inc A-CAES technology.

The Gem Energy Storage Center will use an air compressor that takes air from the atmosphere and pressurizes it, much like the compressors used to move natural gas down pipelines. Once air is pressurized, it heats up to 200 degrees Celsius and is run through heat exchangers to pull the heat out of the air and store it in a hot water tank.

Gem Energy Storage Center (21-AFC-02) Page 2 of 3 Kern County Comments estimated to be 90% effective in reducing evaporation. Therefore, once operational, expected water use is ~29 AF/year. Water is proposed to be supplied by two (2) new onsite groundwater wells supplemented by water purchased from Antelope Valley East Kern (AVEK) Water Agency ...

The Willow Rock Energy Storage Center ("Willow Rock" and formally called the Gem Energy Storage Center) will be located north of the Los Angeles Basin near the community of Rosamond. Also, earlier this year, Hydrostor received confirmation that the California Independent system Operator ("CAISO") allocated

the full 500 MW of resource ...

Willow Rock is a 500 MW Advanced Compressed Air Energy Storage (A-CAES) facility that is under late-stage development in California. As California moves towards its objective of achieving 100% carbon-free electricity by 2045, it will require large-scale, long duration energy storage to fully integrate increasing levels of renewable generation capacity.

Based in Toledo, Ohio since 2009, GEM Energy designs, develops, installs and maintains energy solutions to improve customer business performance and reduce facility operation costs. And as a member of the Rudolph Libbe Group of companies, we have design/build capabilities and a host of other services to steer your energy project from ...

AFC) with the CEC seeking to construct and operate the Gem Energy Storage Center in Rosamond, California. 4. On August 5, 2022, Applicant changed the name of the project to the Willow Rock Energy Storage Center (Willow Rock). 5. Willow Rock was originally proposed as a nominal 500-

Hydrostor's proposed 500MW/4,000MWh Energy Storage Center in California. Image: Hydrostor. Advanced compressed air energy storage (A-CAES) solution provider Hydrostor has chosen Kiewit to provide engineering and design studies for its 500MW Willow Rock Energy Storage Center in California, US.

Willow Rock was proposed by Gem A-CAES, a wholly owned subsidiary of long-duration energy storage solutions provider Hydrostor. Recommended White Papers. Whitepaper. ... The Willow Rock Energy Storage Center will be designed as a 500MW, 4,000 MW-hour (MWh), A-CAES facility, capable of charging and discharging every day. ...

GEM Energia develops renewable energy assets across the UK, Europe and Latin America. Our projects include Battery Energy Storage and Solar developments. We work with institutional financial investors, private investors, JV partners and land owners to deliver renewable energy projects which reduce reliance on carbon based energy generation.
