To achieve climate agreements, and meet its growing energy demands, Gabon is approaching energy planning through a different process. News & Commentary Features/Analysis News Industry Sectors Generation Transmission and Distribution Metering Finance and Policy Climate Change Renewable energy Bio-energy Geothermal Hydropower Solar Wind

Why is Gabon a good country?

Gabon also relies heavily on oil for its export revenues, exporting both crude oil and petroleum. In terms its oil reserves, the country is one of the richest in sub-Saharan Africa, ranking 5th after Nigeria, Angola, Sudan, South Sudan, and Uganda. Renewable energy in the form of solar power is virtually nonexistent.

Are stand-alone solar systems a viable solution for remote communities in Gabon?

Yet, as mentioned earlier, the country is heavily forested, which stands in the way of connecting remote communities to the country's main grid . Therefore, with such solar conditions, stand-alone solar systems would be the ideal solution for power generation for these communities in Gabon .

What type of electricity does Gabon use?

Renewable electricity here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal power. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Gabon: How much of the country's electricity comes from nuclear power?
