

Does CNMI have any fossil fuel resources?

The Northern Mariana Islands (CNMI) have no fossil fuel energy resources. The Commonwealth meets nearly all of its energy needs with imported petroleum products. CNMI is about 179 square miles in area, which is collectively about two-and-a-half times the size of Washington, DC.

How does CNMI meet its energy needs?

The Commonwealth of the Northern Mariana Islands (CNMI) meets most of its energy needs with imported petroleum products. In 2021, refined petroleum products were CNMI's top import and accounted for 18% of the Commonwealth's total import costs that year.

Is CNMI planning a large solar energy project?

There have been proposals for several large solar energy projects in the CNMI's Office of Planning and Development in recent years. Currently, a 20-megawatt solar PV facility on Saipan is in development, which will be the first utility-scale solar farm in the territory and will include a battery electric storage system.

Which sectors use the most electricity in the Northern Mariana Islands?

The commercial sector, led by tourism, is the largest electricity-consuming sector in the Northern Mariana Islands. 53 CNMI hotels use electricity for air conditioning, water heating, water purification, and lighting.

Is a 20 megawatt solar power plant coming to Saipan?

A 20-megawatt solar photovoltaic (PV) facility is being built in Saipan and is scheduled to come online in 2025. CNMI's electric utility generates electricity at five diesel-fueled power plants (three on Saipan and one each on Tinian and Rota) and the territory's entire population has access to electricity.

How many power plants are there on Saipan?

There are three diesel-fueled power plants on Saipan that are operated by CUC. 40 power plants in total supply electricity to the Northern Mariana Islands, with one each on Tinian and Rota.

Northern Mariana Islands . Energy Action Plan . Misty Dawn Conrad and . J. Erik Ness Sponsored . by . the Department of the Interior Office of Insular Affairs . July 2013 . Produced under ...

The Commonwealth of the Northern Mariana Islands (CNMI), situated in the Pacific's Philippine Sea, is home to 47,000 residents, with an economy that is heavily dependent on tourism. The ...

The Commonwealth of Northern Mariana Islands (CNMI) has taken a historic step toward moving toward a cleaner, greener future. Governor Arnold Palacios earlier this week signed the Blue Planet Climate Agreement, a ...

title = "Commonwealth of the Northern Mariana Islands Strategic Energy Plan", abstract = "Describes various energy strategies available to CNMI to meet the territory's goal of ...

Saipan, located in the Northern Mariana Islands, is a highly suitable location for solar photovoltaic (PV) power generation due to its consistent sunlight and high average daily energy yield. The ...

A wet day is one with at least 0.04 inches of liquid or liquid-equivalent precipitation. The chance of wet days in Saipan varies very significantly throughout the year. The wetter season lasts 3.9 ...
