

Is there a market for roof-top solar energy systems in Timor-Leste?

Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.

How long will the integrated power facility last in Timor-Leste?

The duration of the integrated power facility will be about 25 years, and the bid deadline is 1 May. Renewables account for only 8% of the total electricity supply in Timor-Leste, with 99% of that coming from bioenergy and 1% from solar, according to a report issued by the International Energy Agency last year.

How long does a solar system last in Timor-Leste?

High electricity costs and readily available solar radiation mean that the average payback period for a rooftop photovoltaic (PV) solar energy system in Timor-Leste is only 1.5 to 3 years instead of the global average of 6-10 years. Transitioning to solar can also help the country meet environmental commitments.

What is Timor-Leste's energy policy?

The government of "Timor-Leste" is also trying to shift its policy to the introduction of clean energy, such as hydraulic, wind, and solar power generation. However, the most of its national budget for the electric power sector are spent on fuel import and electricity charges, so it is difficult to realize its policy.

What is Timor-Leste's energy field?

For its energy field, "Timor-Leste", as stated in its "Development Strategies by Sector" under the National Development Policy, aims to develop its economic energy sources, such as natural gas, solar power, and hydraulic power, and thereby enhance the capability of power generation/self-supply.

Can Timor-Leste generate solar energy?

As almost the whole territory of Timor-Leste has the potential to successfully generate solar energy, the Government is keen to tap into this potential to setup utility scale solar plants as well as off-grid lighting solutions for remote localities.
