

A Living, Learning Laboratory for Net-Zero The mission for Georgia Tech's Carbon-Neutral Energy Solutions (C-NES) Laboratory is simple: carbon-neutral "net-zero site energy use" expressed simply, directly and honestly through a "no frills" design. The lab is intended to set a new standard for sustainable design for buildings of its type, by optimizing passive energy technologies ...

The facility will be in Bryan County, Savannah, Georgia adjacent to Hyundai Motor Group Metaplant America, currently under construction. Starting construction in the second half of 2023, the joint venture plans to start battery ...

LG Energy Solution (KRX: 373220), a split-off from LG Chem, is a leading global manufacturer of lithium-ion batteries for electric vehicles, mobility, IT, and energy storage systems. With 30 years of experience in revolutionary battery technology and extensive research and development (R& D), the company is the top battery-related patent holder ...

Learn how you can support The Nature Conservancy's work to identify practical, cost-competitive solutions to reduce greenhouse gas emissions in Georgia. The Nature Conservancy brings a science-driven, non-partisan and ...

In 2024, Georgia Tech surpassed 1 megawatt (MW) of renewable energy capacity on campus. Solar photovoltaic (PV) arrays have been installed across several buildings, contributing to our renewable energy generation. In Fiscal Year 2023, these systems produced 895,663 kilowatt-hours (kWh), equivalent to powering over 80 average U.S. homes for a year.

In 2021, there were already 194,908 Georgia workers employed in the energy sector.; In the Atlanta area, 57% of the electric power generation workforce was in wind, solar, and hydroelectric, and almost 38,000 workers ...

The Climate and Energy Policy Laboratory (CEPL) supports the educational and research missions of Georgia Tech's School of Public Policy. CEPL launced and remains affiliated with the Master of Sustainable Energy and Environmental ...

Georgia Power plans to double renewable generation, adding 6,000 MW by 2035, including a request for approval of 2,300 MW in the plan filed Jan. 31. The proposed new capacity would expand Georgia Power's renewable portfolio to ...

We are working with partners to identify practical, cost-competitive solutions that can be implemented now to reduce greenhouse gas emissions in Georgia. ... Led by science, we are committed to tackling climate ...

Exide opens its Global Technology Center in Milton, Georgia to develop new materials, products and processes. The \$4 million Technology Center joins existing facilities in Spain and Germany with the goal of expanding global Research, Design and Engineering activities for a brighter stored energy future.

a high-level overview of Georgia's energy sector. The report is a valuable resource for policymakers and other stakeholders interested in Georgia's energy future. I hope you enjoy reading and learning about Georgia's energy programs, usage, resources, and related trends at a state and national level. As energy demands increase due to ...

Energy Materials Day is part of an ongoing, long-range effort to position Georgia Tech, and Georgia, as a go-to location for modern energy companies. So far, the message seems to be landing. Georgia has had more than \$28 billion invested or announced in electric vehicle-related projects since 2020.

Georgia's energy solutions providers can accelerate the development of renewable energy products, lower risk and reduce costs with access to innovative industry research, renewable natural resources and alternative energy crops, a ...

Increased energy demand and the continued role of fossil fuels in the energy system mean emissions could continue rising through 2025-35. Emissions have not yet peaked, and global CO 2 emissions from combustion and industrial processes are projected to increase until around 2025 under all our bottom-up scenarios. The scenarios begin to diverge toward ...

The Climate and Energy Policy Laboratory (CEPL) supports the educational and research missions of Georgia Tech's School of Public Policy. CEPL launced and remains affiliated with the Master of Sustainable Energy and Environmental Management (MSEEM) degree and its associated Certificate program. In addition, CEPL conducts research on: local, national, and ...

SEOUL, May 26, 2023 - LG Energy Solution (LGES) and Hyundai Motor Group announced an EV battery cell manufacturing joint venture in the U.S. today. LGES and Hyundai Motor Group signed a memorandum of understanding to produce EV batteries in the U.S. and further accelerate the Group's electrification efforts in North America. The signing ceremony took place in LGES's ...
