

Energy storage systems are an integral part of Germany's Energy Transition (Energiewende). While the need for energy storage is growing across Europe, Germany remains the lead target market and the first choice ...

The energy transition and a sustainable transformation of the mobility sector can only succeed with the help of safe, reliable and powerful battery storage systems. The demand for corresponding technologies for electrical energy storage will ...

German regulatory framework covering all aspects of electricity storage facilities as a form of energy storage. Basically, facilities for storing electrical energy are generally understood to be ...

The German government launched a strategy on electricity storage in December 2023. In this context, a study by the leading German energy consultancy, Frontier Economics, offers important evidence on the future role ...

At our Center for Electrical Energy Storage, we are researching the next generation of lithium-ion batteries as well as promising alternatives such as zinc-ion or sodium-ion technologies. We are looking at the entire value chain - from ...

Sonnen began a smart meter rollout for its customers in 2016 and in May this year announced an acceleration of rollout in Germany alongside Solandeo, a German energy equipment and solutions provider. The ...

GESI is a solution partner for energy suppliers and institutional investors. We develop, plan, build and finance efficient and digitized large-scale battery storage systems. GESI supports business partners comprehensively and in all phases ...

Europe and China are leading the installation of new pumped storage capacity - fuelled by the motion of water. Batteries are now being built at grid-scale in countries including ...
