

Why is EC power a leader in Germany?

This is the reason why we are not only the market leader in Germany for cogeneration plants(CHPs) in the performance range of 3 - 80 kWel but we are also the technologically leading manufacturer in Europe. Our branch in Germany has been based in Berlin since 2008 and housing our EC POWER Academy.

Where is EC power based?

Our branch in Germany has been based in Berlin since 2008 and housing our EC POWER Academy. At the headquarters in Hinnerup- near Aarhus in Denmark - are the research and development elements of EC POWER as well as the production facility and the central warehouse. Furthermore, there is a branch in the USA since 2018.

What is EC power Academy?

The EC POWER Academy provides everything, from the basic course to learn about the advantages of the cogeneration of heat and power, to the expert's seminar including professional exchange. Visit our offered seminars in German language or contact EC POWER for seminars in English language. Which XRGi&#174; for your project?

Why should you choose Toyota EC power?

This is possible because of the high-performance engine that Toyota have especially developed for EC POWER. The Mini cogeneration plants for residential and small industrial buildings achieve a total degree of utilisation of up to 106 % and also make the use of combined heat and power interesting for the entry-level range.

What makes the xrgi&#174; a sustainable power supply?

A CHP is fired with gas - however, green gas is already available today. This makes the XRGi&#174; the core component of a modern, sustainable power and heat supply. > What makes the XRGi&#174; so ideal for the future When is it reasonable to use CHP? When is it reasonable to use CHP? When is it reasonable to use CHP?

Why do we make cogeneration plants in Germany?

No wonder, that our company features a pioneering spirit and special innovative strength, as proven by more than 25 patents. This is the reason why we are not only the market leader in Germany for cogeneration plants (CHPs) in the performance range of 3 - 80 kWel but we are also the technologically leading manufacturer in Europe.

XRGi&#174; - optimal mini-kraftvarme-teknologi. Et XRGi&#174;-anl&#230;g best&#229;r af tre hovedkomponenter - Power Unit, Q-varmefordeler og iQ-styringsenhed. For optimal drift tilsluttes en eller flere ...

The innovative power plant makes an active contribution to environmental protection because it is energy efficient, sustainable and significantly reduces CO2 emissions. Founded in 1996, EC POWER has grown to become the ...

EC Power ist mit seinen XRG I&#174;-BHKW und insgesamt &#252;ber 12.000 Installationen in Europa und Amerika f&#252;hrender Hersteller von Mini-Blockheizkraftwerken. 25 Patente begr&#252;nden Vorteile ...
