

What is Elysia's battery intelligence?

Elysia's battery intelligence involves algorithms on the battery for "state estimation". This provides "understanding what energy's available with that battery at any given time", according to Wallace, including the current health status. The true value for this may vary greatly from what the in-vehicle system reports.

Could Elysia power EVs with more sophisticated software control?

According to "battery intelligence" company Elysia, there is plenty of untapped potential in the cells that could be unleashed with more sophisticated software control. JLR will be applying Elysia battery intelligence to forthcoming EVs like the Range Rover Electric. Elysia might not be a name you're familiar with.

How can Elysia improve battery life?

The aim is to prioritize safety but also make the most efficient use of batteries, including longevity. "With the intelligence that we have with Elysia, we know we can stretch batteries safely beyond the typical end of life. We can also make them charge faster, or slower to re-balance elements within the system."

What is Elysia battery monitoring?

This includes both the algorithms operating locally on the battery and remote monitoring in the cloud, which is what Elysia supplies to customers. The aim is to prioritize safety but also make the most efficient use of batteries, including longevity.

What is Elysia & how does it work?

Built on over a decade's worth of real-world battery experience from Fortescue WAE, combined with best-in-class cloud computing, Elysia unlocks value from batteries, making them work for both businesses and the planet. Elysia enables the health and life of any battery to be understood, turning data into actionable recommendations to extend life.

Will JLR use Elysia battery intelligence on EVs?

JLR will be applying Elysia battery intelligence to forthcoming EVs like the Range Rover Electric. Elysia might not be a name you're familiar with. However, it used to be Williams Advanced Engineering and changed its name after being purchased by giant mining company Fortescue.

Elysia Cloud combines expert battery knowledge, world-class data science, and systems understanding to turn standard telematics data into powerful insights. Built on over a decade's worth of real-world battery experience from Fortescue ...

JLR is investing in a strategic collaboration to use Fortescue's cutting-edge battery intelligence software, Elysia; The software is designed to enhance battery longevity, safety and overall performance across JLR's ...

Elysia Cloud Platform helps battery system Original Equipment Manufacturers (OEMs), battery operators and financiers turn data into actionable battery insights, designed to ...

Tuesday, 13 th June 2023: WAE Technologies (WAE), the world-leading technology and engineering services business, has recently launched Elysia, its Battery Intelligence software ...
