

N-Frnds developed the world's first proven big data driven, B2B commerce platform for emerging markets, which digitizes the entire value chain, combining commerce and trade finance. The tech platform is proven at scale (20 million users, 21 patents). Strategic partners include Coca Cola Unilever, Friesland Campina, Microsoft, Mastercard, IFC & ADB. N-Frnds manage a network [...]

This video was produced by BBC StoryWorks and World Energy Council, is part of the Humanising Energy series, which shines a light on human stories across the energy sector.. It features GDC member Powerlive, and how they have built a network of women sales agents that distribute off-grid solar products and productive use of energy (PUE) technologies in rural ...

The passion to identify and develop solutions to the many energy and environmental challenges in Ghana and Africa drives the mission for which ISEES was established. A pragmatic institution that delivers solutions at the grassroots level as well as influencing policies through evidence based approaches helps us to contribute to sustainable ...

The GDC adopts a systems approach, implementing "collective" interventions that support the growth of the sector as a whole. We believe that this will ultimately enable us to support a greater number of members to reach last mile ...

At a time when the Kenyan government is stepping up its efforts to achieve Sustainable Development Goal 6 (SDG 6), which focuses on water and health security for the population by 2030, Kenyan start-up INNO-Neat Energy Solutions wants to do its bit. The company has designed "SafiSolar", a solar water filter that makes water drinkable, with the ...

By Faridat Salifu INNO-Neat Energy Solutions, a Solar water filter company is making significant impact in helping Kenya achieve Sustainable Development Goal (SDGs) 6, which provides for access to clean water for all. This is as the business created "SafiSolar," a solar water filter that can purify water and potentially supply about 250 homes. The [...]

By providing access to clean and safe drinking water, solar-powered water filters can improve public health, reduce poverty, and promote gender equality. They can also contribute to the achievement of SDG 7 by ...

The INNO-Neat Energy Solutions water filter removes contaminants such as bacteria, viruses and heavy metals, making water safe to drink. The system is powered by solar energy to overcome the problem of power cuts. INNO-NEAT has already developed and successfully deployed three "SafiSolar" prototypes with women's groups in western Kenya.

Inno-Neat Energy Solutions We provide clean and sustainable energy solutions, with Our flagship product, Safisolar, offering a portable solar-powered water filter. Safisolar addresses the critical issue of limited access to clean water in low-income, off-grid communities.

INNO-NEAT LTD (Official Page) | 827 followers on LinkedIn. We are in-on-it. Energy solutions for now and the future. | INNO-NEAT means Neat Innovations. We are a tech company that analyses, recycles and repurposes used lithium ion battery cells into Solar Ready battery packs for use in solar and E-mobility applications targeting low income communities. We offer Energy ...

The Safisolar project by INNO-NEAT Energy Solutions is dedicated to providing clean and affordable drinking water to underserved communities through solar-powered water filtration systems. By leveraging renewable energy and innovative technology, we address the critical issue of waterborne diseases caused by contaminated water sources. ...

Inno-Neat Energy Solutions is actively using 2 technologies for its website, according to BuiltWith. These include U.S. Server Location and AdBlock Acceptable Ads. UNLOCK PREMIUM DATA WITH DATABOOST Unlock even more features with Crunchbase Pro . Start Your Free Trial . Stay Connected.

Kenyan startups Drop Access and Inno-Neat have won the Startup|Energy Award at the closing of Energy Camp East Africa on 29 September 2021. A total of five startups from the decentralized energy sector ...

Kenyan start-up INNO-Neat Energy Solutions, founded in 2022, has designed "SafiSolar", a solar water filter that makes water drinkable. The device is designed for rural areas. Lire la suite. Electrically assisted bike / Morocco. ... Ghana - Project "One District - One Factory" (1D1F)

Smart Biogas is a real-time monitoring system for biogas digesters, enabling performance insights, asset management, pay as you go, and more accurate emissions reduction calculation and reporting. The Smart Biogas digital services include: a web platform for biogas companies and organisations; an oversight platform for biogas programs; and a mobile app (SB Home) for ...

Kenyan start-ups, Drop Access and Inno-Neat have won the Startup|Energy Award presented at the end of the Energy Camp East Africa yesterday. The Energy Camp East Africa is a programme held by Startup|Energy which helps start-ups in the field of decentralised, renewable energy supply in East Africa to grow and develop.
