

Is risen energy a green energy company?

Risen Energy has increased its clean energy usage to 31,320,210 kWh, up 9.4% year-on-year. It has also purchased 6,424,000 kWh of green electricity, and set a new low in the French carbon footprint certification at 376.5 kg eq CO<sub>2</sub>/kWh -- thanks to the Company's HJT module product.

Is risen energy a global leader in photovoltaic technology?

This remarkable Pmax output solidifies Risen Energy's position as a global leader in photovoltaic (PV) technology. Recently, Risen Energy won the bid as the first candidate for China Datang Co., Ltd. (hereinafter referred to as "China Datang") for the 2024-2025 centralized procurement of photovoltaic modules (bidding section 3).

What services does risen energy provide?

Risen Energy also provides services such as construction, operation, and maintenance of the solar power stations; design and technical planning; leasing and building permits; site inspection and development; financing, consulting and installation, and system upgrade.

Is risen energy UL9540A certified?

Risen Energy's independently developed liquid-cooled battery energy storage system was the first in China to be certified by both Chinese and American UL9540A standards. In Risen Energy's latest ESG report, the Company noted that it has obtained the SA8000 certification.

How efficient is risen energy's HJT hyper-ion module?

The Company set a new record efficiency rate of 23.9% for its heterojunction (HJT) Hyper-ion Modules in 2023, with a projected production capacity of 21GW by 2024. Risen Energy's innovations include the development of 0BB cell technology, 210 ultra-thin silicon wafer technology, pure silver consumption < 7mg/W and Hyper-Link technology.

Does risen energy have a SA8000 certification?

In Risen Energy's latest ESG report, the Company noted that it has obtained the SA8000 certification. Risen Energy has increased its clean energy usage to 31,320,210 kWh, up 9.4% year-on-year.
