

# Golden race energy storage project approved

How many energy storage contracts did the CPUC approve?

The CPUC approved five energy storage contracts for a total of 497 megawatts (MW) of capacity, which are expected to provide 462 MW of capacity towards SCE's portion of the 11,500 MW of clean energy capacity ordered by the CPUC in June 2021 in the integrated resource planning (IRP) proceeding.

What is California's 'Gateway' Energy Storage Project?

The Gateway installation is the latest in a series of large battery energy storage projects in California, a state counting on energy storage to help supplement its baseload power supply, and replace generation lost due to the closure of thermal power plants.

What are California's new battery energy storage projects?

The Gateway and Moss Landing projects are just two of the battery energy storage installations being developed across California, a state that has ramped up its use of renewable energy in recent years while phasing out electricity from coal, nuclear, and natural gas-fired power plants.

Where is the largest battery energy storage project in the world?

1. The Gateway Energy Storage project is located in San Diego County, California. At 230 MW of generation capacity, and soon to be at 250 MW, it is currently the largest battery energy storage project in the world. Courtesy: McCarthy Building Companies

How many MW does gateway energy storage have?

Gateway Energy Storage is currently energized at 230 MW and is on track to reach 250 MW this month, according to McCarthy. The project was launched and connected to CAISO's grid in June, with an initial 62.5 MW of storage. LS Power said the project reached 200 MW of capacity on Aug. 1, with an additional 30 MW added on Aug. 17.

How many energy storage projects does PG&E own?

PG&E has selected offers for three energy storage projects from third-party owners, with a total capacity of 385.5 MW and 1,540 MWh. PG&E will not own one of these projects, which has a capacity of 182.5 MW and 730 MWh. The energy storage projects are being built to avoid the need to keep three Calpine gas-fired plants running as RMR resources and to shore up congestion issues in the region.

S&P Global California Community Power on Jan. 19 unanimously approved an agreement with an affiliate of LS Power Corp. to supply an eight-hour energy storage project ...

## **Golden race energy storage project approved**

The two projects were selected as part of phases 2 and 3 of SCE's Midterm Reliability RFO (MTRRFO) - released in October 2022 and February 2023, respectively - and will fulfil part of the utility's procurement ...

Golden Valley Electric Association (GVEA) is soliciting proposals (RFP) from a qualified firm to provide a new Li-Ion BESS to provide transmission system stability, renewable energy support ...

Goldeneye The Goldeneye Energy Storage project is a proposed 200MW/800MWh standalone BESS located on the eastern outskirts of Sedro-Woolley in Skagit County, Washington. Tenaska has yet to decide ...

The project is part of a Biden Administration effort to speed approval of major clean energy projects in order to decarbonize the U.S. electricity grid by 2035 -- a feat that will ...

Battery storage is a way to optimize energy by storing power for use at a later time. The SGIP-ERB California focuses on installation of energy storage technologies to service communities ...

The CPUC authorized PG& E to issue a solicitation for energy storage projects to replace three power plants that would otherwise require reliability must-run (RMR) contracts.
