

DOI: 10.1016/j.csite.2022.102497 Corpus ID: 252988542; Graphene aerogel stabilized phase change material for thermal energy storage @article{Zhao2022GrapheneAS, title={Graphene ...

Phase-changing materials are nowadays getting global attention on account of their ability to store excess energy. Solar thermal energy can be stored in phase changing material (PCM) in the ...

Energy storage and conservation are receiving increased attention due to rising global energy demands. Therefore, the development of energy storage materials is crucial. Thermal energy ...

The use of phase change materials (PCMs) for TES became crucial after the energy crisis of 1973-1974, offering an elegant and practical option to improve the efficiency ...

The combination of reduced graphene oxide/cellulose sodium aerogel (rGCA) and lauric acid/myristic acid binary eutectic phase change gel (LMG) creates a composite phase change material that possesses ...

2 ???&#0183; Once again, graphene"s versatility in producing paper-based electrodes for energy storage becomes visible. These systems behave as flexible energy storage films and, for more ...
