

Great news for the energy storage industry

What is the future of energy storage?

Renewable penetration and state policies supporting energy storage growth Grid-scale storage continues to dominate the US market, with ERCOT and CAISO making up nearly half of all grid-scale installations over the next five years.

What happened to energy storage systems?

Industry attention was also devoted to the effectiveness of applications and the safety of energy storage systems, and lithium-ion battery energy storage systems saw new developments toward higher voltages. Energy storage system costs continued to decline.

Will energy storage grow in 2024?

Allison Weis, Global Head of Energy Storage at Wood Mackenzie Another record-breaking year is expected for energy storage in the United States (US), with Wood Mackenzie forecasting 45% growth in 2024 after 100% growth from 2022 to 2023.

Which energy storage technologies have been made a breakthrough?

Breakthroughs have been made in a variety of energy storage technologies. Lithium-ion battery development trends continued toward greater capacities and longer lifespans. CATL developed new LiFePO batteries which offer ultra long life capabilities, while BYD launched "blade" batteries to further improve battery cell capacities.

How many energy storage projects were completed in the second quarter?

1,680 megawatts of energy storage projects were completed in the second quarter, the highest ever for a single quarter, according to a report issued this week by Wood Mackenzie, a research firm, and the American Clean Power Association, a trade group.

What's new in energy storage in the second quarter?

In the second quarter, all new storage projects involved batteries. The largest project, with a capacity of 350 megawatts, was the third phase of Moss Landing Energy Storage in California, which went online in June.

Europe and China are leading the installation of new pumped storage capacity - fuelled by the motion of water. Batteries are now being built at grid-scale in countries including ...

6 ???#0183; The Winners Are Set to Be Announced for the Energy Storage Awards! Energy Storage Awards, 21 November 2024, Hilton London Bankside ... due to take place in Milan, Italy on 21st November, will see industry experts discuss ...

Great news for the energy storage industry

The role of energy storage in the safe and stable operation of the power system is becoming increasingly prominent. Energy storage has also begun to see new applications including generation-side black start services ...

Image: Solar Media. Fluence and Atlantic Green took home two trophies each as our publisher Solar Media hosted the first-ever annual Energy Storage Awards.. The 2023 ceremony was held at a prestigious London ...

Anthony Price (far left) at this year's International Flow Battery Forum in Prague, Czechia. Image: IFBF via LinkedIn. Energy storage industry veteran and tireless clean energy technology advocate Anthony Price, ...

In an interview for Energy-Storage.news in late November, US national Energy Storage Association (ESA) CEO Kelly Speakes-Backman said that 2021 will be an "important year for energy storage" and that the industry ...
