

Who is Mova energy?

MOVA Energy is a pioneer in the field of digital energy. Reach out to us and learn how we help various energy companies in different countries to maintain and grow their customer base.

Will Greece become a net exporter of energy?

There are multiple high profile electricity interconnector projects in discussion, with two aiming to connect Greece with Egypt for the purpose of exporting renewable energy into Greece and beyond. As Greece further develops these projects, it positions itself to become a net exporter of energy in the region.

How will Greece transform its energy sector in 2022?

In June 2022, Energy Minister Skrekas stated that 44 billion Euros would be dedicated to the structural transformation of Greece's energy sector which would include increasing renewable energy capacity to 25 GW from the current 9 GW and tripling the volume for LNG storage. The phaseout of lignite plants was delayed until 2028.
