With the help of 60 battery systems, the new storage facility on the site of RWE's pumped storage power plant at Lake Hengstey will be able to temporarily store around 4.5 MW of electricity, the company announced. Audi previously used the decommissioned batteries provided for the project in E-Tron development vehicles.

RWE expects to begin marketing the storage capacity of its second-life battery storage system from the beginning of 2022, initially to help maintain the frequency in the electricity grid. The plan is then to test other marketing methods on a flexible basis. RWE intends to draw on the insights gained from the reference storage system in Herdecke to

The 60 battery systems in the innovative storage unit on the site of the RWE pumped storage power plant in Herdecke, North Rhine-Westphalia, can buffer around 4.5 megawatt hours of electricity. The batteries taken out of service for the project come from Audi E-tron development vehicles. After their first life in the car, they still have a ...
