

How do battery storage systems make money?

Several sources of revenue are available for battery storage systems that can be stacked to further increase revenue. Typically, price arbitrage is used to gain revenue from battery storage. However, additional revenue can be gained from participation in ancillary services such as frequency response.

What are the benefits of stacked battery storage systems?

Frequency response participation increased revenue and reduced total operating cost. Stacking frequency response reduced degradation, increasing battery lifetime. Several sources of revenue are available for battery storage systems that can be stacked to further increase revenue.

How has the battery revenue stack changed?

Joe looks at how the battery revenue stack has changed. Batteries maximize revenues by performing actions across multiple markets, 'stacking' revenues from each. These markets and corresponding actions occur across different time horizons. Some operate years out, such as for the Capacity Market. Others occur within the day or even in real-time.

Does revenue stacking affect battery degradation?

A breakdown of market revenue and value of investment is presented for five operating strategies. The value of availability revenue and response energy revenue are distinguished for frequency response services. Finally, the impact of revenue stacking on battery degradation is assessed.

Does stacked frequency response increase battery life?

Stacking frequency response reduced degradation, increasing battery lifetime. Several sources of revenue are available for battery storage systems that can be stacked to further increase revenue. Typically, price arbitrage is used to gain revenue from battery storage.

What is the biggest revenue stream for battery energy storage?

Trading power on the wholesale market has become the largest revenue stream for battery energy storage. Over the lifetime of a battery built today, we forecast wholesale trading to represent 52% of total revenues. Batteries profit from the spread between their charge and discharge prices.
