

The pattern of energy production and use in Guam is shaped by its location, a remote island. Almost all energy is reliant on imports of petroleum products for use in transport and electricity. Guam has no domestic production of conventional fuels such as oil, natural gas or coal. Its economy is dependent on the import of gasoline and jet fuel for transport and residual fuel oil for electricity. One third of electricity produced is used in commercial settings including the leading industry of touri...

A TBG tamb#233;m busca g#225;s para para o uso em seu sistema de transporte. A TBG abriu dois processos, que recebem propostas at#233; o dia 30 de setembro. A primeira consulta ao mercado da TBG é para fornecimento de ...
