

Is Guatemala a good place to invest in solar energy?

Guatemala is the second largest Central American power market, with a goal to increase renewable energy use. Relatively high levels of solar irradiance and large areas of cleared land give the country a strong potential for increased solar energy development.

Which solar power plant is commissioned in Guatemala?

In July 2015, a new 30 MW Horus II solar power plant was commissioned in Guatemala. This project is an extension of the 50 MW Horus I, which was launched at the beginning of the same year. The Horus I and Horus II projects, with a combined capacity of 80 MW, are located in the province of Santa Rosa.

Does Guatemala have solar energy?

Solar energy has been developing in Guatemala since 2013, and the first tender for the purchase of solar energy was held the following year. Today, this country with unlimited solar resources has become one of the leaders in the region in the use of renewable energy sources, practically abandoning fossil fuels.

Where are solar power plants located in Central America?

Firstly, the very first photovoltaic irrigation system in Central America was opened in Guatemala in 2018. Secondly, the Horus Energy solar power plant with an installed capacity of 80 MW is one of the three largest in the region. In July 2015, a new 30 MW Horus II solar power plant was commissioned in Guatemala.

What is the largest solar power plant in Latin America?

In 2018, the Italian renewable energy company Enel inaugurated the largest solar power plant in Latin America. Villanueva is a giant solar park with an installed capacity of 828 MW in the south of Coahuila. The park consists of more than 2.3 million photovoltaic modules installed on an area of 2,400 hectares.

How many solar power plants are there in Mexico?

Mexico today has more than 130 large private solar and wind power plants, 69 of which use photovoltaic technology. In 2018, the Italian renewable energy company Enel inaugurated the largest solar power plant in Latin America. Villanueva is a giant solar park with an installed capacity of 828 MW in the south of Coahuila.
