

What is wind energy used for in Guinea Bissau?

Wind energy is extracted from wind speeds by wind turbines. It was first used to produce mechanical power (windmills). Nowadays, it is mainly used for the production of electrical power. Unfortunately, none were counted in Guinea Bissau.

Is Guinea-Bissau a viable energy resource?

The coast of Guinea-Bissau, with its deeply indented coastline, experiences high tidal range values making this a commercially viable energy resource. The highest mean annual tidal amplitude of 3.4 m was recorded at Porto Gole, on the banks of Rio Geba and could generate 50 MW of electricity (REEEP, 2012); (DICAT, undated).

What techniques are used to produce electricity in Guinea Bissau?

The main techniques used for the production of electricity are dams but there are also other techniques such as: Run-of-the-river hydroelectric, pumped-storage hydroelectricity, Tidal power and wave power. 1. Guinea Bissau has an important site for the construction of a dam with a good potential for power generation.

Can Guinea Bissau use solar energy?

Table 1: Solar insolation in a horizontal plan in Guinea Bissau With a yearly average of over 5.8 Kwh/m<sup>2</sup>/day (table 1), GB should be able to take advantage of all solar energy applications.

Is hydroelectricity a viable source of energy in Guinea-Bissau?

But by 2015 hydroelectricity was not still not an important source of energy. The coast of Guinea-Bissau, with its deeply indented coastline, experiences high tidal range values making this a commercially viable energy resource.

How many PPAs has EAGB signed with IPPs in Guinea Bissau?

In Guinea Bissau, the power purchaser EAGB has signed two PPAs so far: the first with the Karpowership company for a 30 MW HFO power barge, and the second with Electricité de Guinée (EDG), the national public electric utility of Guinea, for importing power through the OMVG transmission line by 2022.

The west-African nation of Guinea-Bissau represents a particularly attractive market for energy explorers, owing to the largely unexplored on- and offshore basins. ... According to the ECOWAS Center for Renewable Energy and Energy Efficiency, Guinea-Bissau is the perfect destination for the testing and demonstration of grid-connected and mini ...

Energy Situation and Priorities 1. Guinea-Bissau has a dual energy economy based on domestic wood-fuels and imported oil. About 90% of total energy consumption is accounted for by firewood and charcoal, which are used in almost all households for cooking as well as in traditional rural, commercial and artisanal

activities.

The electricity sub-sector in Guinea-Bissau remains one of the least efficient in West Africa. Serious challenges faced include: (i) discrepancies between supply and demand; (ii) waste resulting from obsolete distribution networks, with a loss rate of almost 47%; (iii) low investments; (iv) the poor commercial and financial performance of the national power utility; and (v) an ...

The Lomé-based African Biofuel & Renewable Energy Company (Abrec) has awarded a contract to Sinohydro to build a 20MWp solar plant at Gardete, 8km from Bissau, as well as a 30kV connection to the B&#244;r substation. Abrec said six eligible bids were received in an international tender that closed in May last year. Work is expected to take 16 months.
