

Is Haiti a good place to install solar power?

The domestic market in Haiti for reliable clean energy systems is largely untapped, with electricity demand expected to increase by 50% by 2030. The island's tropical climate makes it an ideal location for solar deployment.

Does Haiti have a solar microgrid?

Earlier this year, Haiti launched its second solar microgrid in the south of the country. The microgrid was created by US-based EarthSpark International in collaboration with Enèji Pwòp, Haiti's in-country social enterprise arm, with plans to create 22 additional grids over the next four years.

Can private investment help solve Haiti's energy crisis?

"We have had this energy crisis for a long time, more than 20 years," says Evenson Calixte, managing director of Haiti's Autorité Nationale de Régulation du Secteur de l'Energie (ANARSE), the nation's energy regulatory authority. "And we believe that one element that can help reform this sector is private investment."
