We help you return home safely to your family through the delivery of nationally recognised training, industry specific qualifications, plant and equipment tickets, qualifications and, of course essential safety and induction training.

Harness Instructors have been hand-picked from a global stage and have successfully implemented a human factor approach to our programs. This approach to training has resulted in reduced anxiety levels, enhanced performance, greater retention and an overall positive learning experience throughout our courses.

The solar farm will produce around 154,550 MWh annually to power approximately 40,000 households, supporting Latvia's energy independence and renewable energy goals. This project, expected to connect to the grid by the end of 2025, aims to increase the share of renewable energy in Latvia's electricity generation from 53% to 80% by 2030.

The International Energy Agency predicts that solar power will outpace all other forms of energy by 2040, but solar energy's inevitable downfall is that it can't work when the sun isn't shining. Enter Neutrino Energy and its Power Cubes, able to harness the power of cosmic radiation, or neutrinos, even in total darkness.
