How much solar power will Hungary have by 2030?

According to the timetable set by the new National Energy Strategy adopted in January, at least 6,000 MW of solar capacity must be operating in Hungary by 2030, which can only be accomplished if large-scale project development starts in the country as soon as possible. Are you considering entering other markets?

How big is a power plant in Hungary?

As a pioneering approach in Hungary, we have been focusing on installed power plant capacities up to 50 MW since 2017, which is much larger than the average Hungarian project size today (the most typical project size is still in the range of 0.5 MW).
