

Energy storage: Storing electrical energy as hydrogen fuel is now feasible at high density with HyET's compression technology. Hydrogen energy storage is the solution for a multitude of intermittent or distributed, renewable energy sources to address the seasonal character of renewables + grid flexibility.

Just last week, the billionaire known as "Twiggy", and Julie Shuttleworth, Chief Executive of FFI -- a subsidiary of FMG -- announced FFI had acquired a majority share in Netherlands-based High yield Energy Technologies (HyET) Group, which counts among its assets the solar PV module manufacturer HyET Solar.

Marcel van de Kar, Vopak director New Energies added: "This project allows us to accumulate knowledge and experience with generating green electricity at our terminals and gives us the opportunity to explore the ...

Fortescue Metals's green energy unit has bought a 60% stake in Dutch-based renewable firm High yield Energy Technologies (HyET) Group in a bid to cut costs and boost green energy production. "HyET Hydrogen's technology will support ...

About HyET Solar BV. HyET Solar forms part of the High yield Energy Technologies (HyET) Group that develops technologies to accelerate the energy transition. HyET Solar, established in 2012, develops low cost thin-film flexible solar modules that have significant cost and application benefits over traditional glass PV panels.

HyET group create technologies that enable commercially viable, large scale access to decentral renewable energy sources. The primary objective of the HyET group is to develop a sustainable and profitable business ...

Fortescue Future Industries (FFI) has extended its reach into the hydrogen ecosystem with the acquisition of a 60% stake in High Yield Energy Technologies (HyET) as the group targets supplying 15 million tonnes of green hydrogen by 2030.

Australia-based Fortescue Future Industries has acquired a 60 % stake in the Dutch-based High yield Energy Technologies Group.FFI also provided the majority share of financing for expanding HyET Solar's Dutch Solar PV factory.

Fortescue Metals Group Ltd's green energy unit said on Thursday it bought a 60% stake in Dutch-based renewable firm High yield Energy Technologies (HyET) Group in a bid to cut costs and boost ...

About High yield Energy Technologies (HyET) Group HyET Group develops technologies that enables commercially viable large scale implementation of renewable and decentralized energy generation and

distribution. HyET Group currently consists of two companies: HyET Hydrogen and HyET Solar. HyET Hydrogen develops technology to enable large scale ...

The unique features of Powerfoil technology enable applications in both high volume markets such as solar farms as well as high value markets such as building integrated PV. About HyET Solar Our Product Careers Contact Us

Australian based Fortescue Future Industries (FFI) has acquired a 60 per cent stake in Dutch based High yield Energy Technologies (HyET) Group and provided the majority share of financing for the expansion of HyET Solar's Dutch Solar PV factory.

a HyET group company COST-EFFECTIVE AND ENERGY EFFICIENT PRODUCTION OF GREEN HYDROGEN 2022.05.03 Low-cost electrolysis for hydrogen production. Value proposition HyET E-Trol's core technologies reduces the CAPEX and OPEX of green hydrogen production, allowing for large scale access ... resulting in very high energy efficiencies.

Australia's Fortescue Future Industries (FFI) has taken a 60% stake in Dutch company High yield Energy Technologies (HyET) Group to assist in its ambition to supply 15 million tonnes of green hydrogen globally by 2030. The green energy company of Fortescue Metals Group Ltd (ASX:FMG) has also provided the majority of financing for the ...

About High yield Energy Technologies (HyET) Group. HyET Group develops technologies that enables commercially viable large scale implementation of renewable and decentralized energy generation and distribution. HyET Group currently consists of two companies: HyET Hydrogen and HyET Solar. HyET Hydrogen develops technology to enable ...

HyET Solar has integrated APCVD, PECVD process technology into a roll-to-roll production line, enabling the possibility of high volume and high yield. Circularity The Powerfoil is designed with circularity in mind, using sustainable materials and processes to ...
