How did we choose the best home battery storage in the UK? 1.

Does 0% VAT apply to residential battery storage systems?

This exemption now applies to all residential battery storage systems, whether they are installed as new, retrofitted, or in conjunction with a solar panel system. Previously, the 0% VAT benefit was only available to domestic solar batteries when installed alongside a new solar panel system.

Should you buy a long-life battery for your solar system?

The battery's life cycle and discharge rate can actually make or break the cost of your solar system. Here's the scoop: A long-life battery might pinch a bit more at first - but in the long haul, it can be better bang for your buck. The overall cost changes once you get a reliable battery in there. Sources:

Is solar battery storage a good investment?

While solar battery storage is optional, it's a wise investment if you want to be able to store your solar panel's excess energy once the sun goes down. It's not a particularly expensive addition to a solar energy system and its inclusion can save you money in the long run and even give you the ability to sell excess energy back to the grid.

What is solar battery storage?

As the name suggests, solar battery storage, also referred to as an energy storage system, allows you to store electricity generated by your solar panels during the sunlight hours. This makes the electricity readily available for use in the evenings or on dull days, allowing you to become more self-reliant and reduce your reliance on the grid.

A 5kWh standalone storage battery costs around £5,000, and if you're looking for a larger battery, a 10kWh model will set you back about £7,000. If you bought a 10kWh battery as part of a solar & battery system however, ...
