How do I connect my energy storage system?

Install your energy storage systems quickly, safely, and cost-effectively for applications up to 1,500 V - with pluggable battery connections via busbar connection or via battery pole connector. Benefit from the advantages of both connection technologies for front or rear connection.

Why do we need special connection technology for battery storage systems?

Special connection technology optimized for use in storage systems is required in order to connect these storage systems quickly, safely, and efficiently. Busbar connections and battery-pole connectors for battery storage systems are safe and cost-effective. Find out more here in the video.

Are home energy management & battery storage solutions changing?

Home energy management and battery storage solutions are now on the fast track of change. Molex is trusted in providing innovative solutions to rapidly evolving industries and applications. Today's design engineers are seemingly faced with the impossible.

How to connect a busbar to an energy storage system?

Connectors for connecting to the busbar simplify the installation of slide-in systems in energy storage systems. The connectors with reverse-polarity protection are plugged onto the rear side of a storage system and are suitable for system voltages up to 1,500 V.

Why should you use DC connectors for home storage applications?

The new connectors for home storage applications are especially suitable for use on battery inverters. DC connectors protected against polarity reversal prevent mismatching in common PV connection technology and battery-pole short-circuits. Energy storage systems enable the self-consumption of renewable energy regardless of when it is generated.

How effective are home battery storage solutions?

Home battery storage solutions are only as effective as the components within them, leaving little room for fault. Molex recognizes high power solutions form the backbone of these applications, and offers a broad portfolio of high-performance busbars, connectors and cable assemblies.
